-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

This action is responsive to the preliminary amendment filed on 07/23/2004. The non-final rejection mailed on 07/26/2004 has been withdrawn.

#### ***Claim Rejections - 35 USC § 102***

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 2-3, 19, and 33-42 are rejected under 35 U.S.C. 102(b) as being anticipated by Bolanos et al. (U.S. 5,423,858). Bolanos teaches a nasal surgery augment comprising a female connector (220) and a male connector element (210) including a button (211a), wherein the male connector and female connector can be snap-fit together. Referring to claim 33-42, Bolanos teaches a first and second connector element as described above which can be mechanically engaged together without the use of screws. Referring to claim 35, Bolanos discloses connectors that can be snap-fit together, wherein the connectors have a degree of resilience. Bolanos also teaches one of the connector elements having a plurality of notches. Referring to claims 41 and 42, the connectors have both rounded and polygonal portions.

#### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 3764

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 13-14, 16, and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bolanos. Bolanos teaches the claimed invention including a female connector element comprising a strut. Bolanos teaches the claimed invention except for a plurality of through-openings. It would have been obvious to one of ordinary skill in the art at the time of invention to provide a plurality of openings in order to allow for greater flexibility of placement during nasal procedures.

#### ***Response to Arguments***

5. Applicant's arguments with respect to claims 2-3, 13-14, 16, 19, and 33-42 have been considered but are moot in view of the new ground(s) of rejection. Applicant is reminded that claims are construed in their broadest reasonable light. Furthermore, functional recitations must amount in structural difference from the prior art of record. As stands, Applicant's claims in their most basic form are drawn to a male and female connector element that can be snap-fit together. Absent further limitations the prior art cited above meets the claim language.
